

Figure 1. Vertical stack of a 200-bed hospital.

The diagram illustrates the vertical organization of a 200-bed hospital. The building is a 10-story structure with a central core and wings extending outwards. The legend at the top identifies the colors for different departments: Patient Care (green), Support Services (yellow), Administration (blue), and Emergency (red). The building is divided into three main sections: Emergency, Inpatient, and Outpatient. The Inpatient section is further divided into Medical, Surgical, and Obstetric/Gynecology. The Outpatient section includes Ambulatory Care, Diagnostic, and Therapeutic. The diagram also shows the location of the Emergency Department, Inpatient Units, and Outpatient Clinics. The building is a 10-story structure with a central core and wings extending outwards.
